

Associate in Applied Science

Criminal Justice: Forensic Tech

THE PROGRAM

The Forensic Tech Program provides students with learning experiences and instruction in the technical areas of forensics science, allowing them to develop the skills necessary for this specialty area of criminal justice. Forensic Technology includes identification, documentation, collection and processing of a wide range of evidentiary items including DNA, ballistics, fingerprints, tool impressions, and toxicology. Students will also learn crime scene reconstruction and analysis. An associate level Forensic Tech Program is an excellent way to get a basic understanding of the field and to prepare students for entry-level work or advanced study. Requires 60 credit hours.

The CRJ Program is part of the Law, Public Safety, Corrections & Security Career Cluster: Planning, managing, and providing legal, public safety, protective services and homeland security, including professional and technical support services. For more information, visit www.careertech.org/career-clusters/.

CAREER OPPORTUNITIES

Professionals in Criminal Justice enjoy a wide range of career choices: loss prevention specialist, private security officer, private investigator, coroner, police officer, correctional officer, forensic nursing, federal agent, crime scene investigator, laboratory technician, probation officer, or parole officer.
